

PEDESTRIANS

Cross one direction of traffic at a time at designated locations. Vehicles are required to yield to pedestrians; yet, pedestrians should exercise care when crossing any roadway.

BICYCLISTS

Occupy the center of your lane through the roundabout.

EMERGENCY VEHICLES

If in the roundabout, proceed through your exit and pull over.
If you haven't entered the roundabout, pull to the right and wait.

Tips & Guidelines for Drivers, Pedestrians, & Bicyclists

DRIVING through a roundabout

SLOW down when approaching the roundabout. 15 mph or less is appropriate through the roundabout.

CHOOSE your lane — depending on your destination. **DO NOT** change lanes in the roundabout.

LOOK for pedestrians at the crosswalks as you approach the roundabout. Stop for pedestrians; they have the right of way.

YIELD to all vehicles in the roundabout. Look to your left and wait for a gap in the circulating traffic before entering.

ENTER the roundabout. Once in the circulating lane, do not stop and do not overtake vehicles ahead of you.

EXIT the roundabout in the direction of your destination. Street signs are posted to guide you.

LOOK for pedestrians at the crosswalks as you exit the roundabout. Stop for pedestrians; they have the right of way.

Cordata Parkway Roundabouts

The Benefits

Fewer and less serious crashes

The circular flow of traffic eliminates head-on and "T-bone" collisions. The angles of traffic interaction and slower speeds through the roundabout reduce the severity of accidents.

Environmentally friendly

The continuous flow of traffic vehicles consumes less fuel, emits fewer pollutants, and produces less noise as compared with traffic stopping and then accelerating at a signal or stop sign.

Increased traffic flow

Overall, more traffic can flow through a roundabout than through a conventional intersection with its stop-and-go traffic.

Cost efficient

Compared to a traditional intersection with traffic signals, the roundabout is less costly to operate.

Aesthetically pleasing

The roundabout center islands can feature landscaping, flowering plants, and even sculptures.
